DAHLIAS

1920-21 FIELD LIST

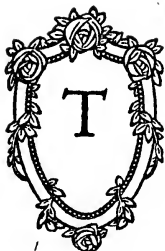

Huntington Beach Nurseries

Joseph Vavra, Proprietor

Seventh and Main

Huntington Beach, -- California

THE following is a complete list of varieties of Dahlias growing in our fields this season; it is not intended as a catalogue, but more as a guide to visitors in identifying the different sorts. The list is arranged in numerical order and the numbers correspond to those found on the field stakes. [A fully descriptive catalogue will be issued about the first of the year; this will contain only the varieties which we will have to offer in the spring. [A number of the varieties are being grown by us for the first time this season, and the classification and colors of these have been taken from the introducers' descriptions. It sometimes happens that varieties are sent out which are not true to name; this will explain any discrepancies in the list.

Prices quoted are for field grown divided roots except where noted "plants only;" such varieties will be furnished as growing plants from 2½-inch pots about June 1st, and will give equally as good results as the roots.

All roots and plants are guaranteed to be true to name as grown in our fields, and to reach our customers in a growing condition; should any prove otherwise they will be cheerfully replaced.

Postage will be prepaid on all orders over \$2.00; on orders for less amounts a charge of 15 cents for packing and postage is made. This does not apply to orders called for at our store.

The gardens are open to visitors every day in the week and also on Sundays, and Dahlia lovers are cordially invited to make a special effort to visit our gardens during September and October, as the fields are at their best in those months. A more satisfactory selection of varieties can be made from plants while in bloom than from a catalogue—no matter how complete the descriptions may be; so intending growers are urged to place their orders in the fall for spring delivery. It always happens that the supply of many of the varieties is exhausted before spring, and all orders are filled strictly in rotation.

We have one of the largest and best collections of Dahlias in the West—40,000 plants on nearly five acres, grown especially for roots under field culture without being forced or over-fertilized.

The following abbreviations are used in the classification:

cac—cactus.
pae—paeony.
pom—pompon.
sing—single.

dec—decorative.
col—collarette.
hyb—hybrid.
show—show or ball.

NEW SEEDLINGS.

These are numbered differently from the named varieties: the number consisting of three parts, showing the year the seed was planted, the number of the parent variety, and the seedling number. For example: "18-23-30" designates 1918 seedling No. 30 from Geisha.

A few of the varieties from which seed was planted have been dropped from our collection and consequently the parent numbers do not correspond to the list for this season. They are as follows:

- 18-46 parentage Easton.
- 18-47 parentage Else (cac).
- 18-51 parentage Auguste Nonin.
- 19-86 parentage Variegated Liszt.
- 19-265 parentage Monarch.

There are some really wonderful Dahlias in our collection of seedlings, and a few will be placed on the market this season. A special descriptive list of these will be made out in the fall after the varieties have been thoroughly tried out for the third year.

A copy will be sent to anyone interested in growing the newest and finest Dahlias.

DAHLIA SEED.

Our seed is saved only from the finest varieties, and those which our experience has shown will produce the best seedlings; the parent plants are especially selected for color, keeping qualities and strength of stem. It is the same strain that we plant in the production of our new varieties, and should produce some wonderful new Dahlias.

Offered in two sizes of packets: 50¢ and \$1.00 each.
